

MyEcoChicWedding.com has compiled this valuable Planning Time Table to help you effectively manage the planning of your special day. By following this count-down checklist you should stay organized and stress-free; after all, planning your wedding should be a joyous and fun process.

Nine to Twelve Months Ahead

- Announce your engagement
 -  Avoid the traditional newspaper announcement. Instead, send an e-card announcing your engagement. Try our "Save-the-Date" e-card at www.ecochicweddings.weddingwindow.com.
- Develop a budget and determine how expenses will be divided between the bride and groom's family (See Budget Planning Worksheet).
- Set a date. Check availability of date with your preferred venues and officiant
- Book your venue(s) and officiant
 -  By hosting both the ceremony and reception at one location you will drastically reduce the amount of greenhouse gas emissions produced by your guests vehicles
 -  Encouraging your guests to carpool is also a great way to reduce emissions.
- Decide on the type of wedding: Formal or informal, small or large
- Research and book caterer if not included with venue. Remember to always sample prospective caterers menus; meet with them personally; ask the right questions; obtain references and check with your local Better Business Bureau.
 -  Try to choose a caterer who uses locally grown organic produce from sustainable farms or community markets. With today's growing trend towards a healthier, greener lifestyle more and more caterers are incorporating organic menus into their repertoire.
- Purchase wedding insurance. The decision to purchase wedding insurance is well worth the cost. Wedding insurance can save you thousands by protecting you against unforeseen disasters and emergencies which could cause a cancellation or rescheduling of the wedding.
- Book your hotel room if required
- Choose wedding party: Bridesmaids, Groomsmen, Ushers, Flower Girl...

- Start developing your guest list and gather addresses
 -  Save a tree and your budget by gathering as many email addresses as possible. Sending invitations, save-the-date cards and other wedding correspondence by email is a great eco-friendly alternative to traditional mail and will save you lots of money.
 - Research and book your photographer and videographer. Remember to review samples/portfolio of their work; meet with them personally; provide them with a list of your preferred poses; ask the right questions; obtain references and check with your local Better Business Bureau. (See Interview Questions for Photographer & Videographer)
 - Research and book DJ/musicians/entertainment. Remember to evaluate demo CDs of their work; meet them personally, clearly outline your expectations of what music genres will be played; obtain references and check with your local Better Business Bureau.
 - Research and book transportation
 -  Why not skip the monster limousines and opt for an eco-friendly and fun low emission vehicle. For a romantic touch try a horse drawn carriage.
 - Select your bridal gown and accessories
 - Plan for travel requirements: passports, identification, accommodation etc.
 - If hiring a wedding consultant, do so now
 -  Try to find a wedding planner who specializes in Green Weddings.
-

Six to Nine Months Ahead
